EXPERIENCE

Feefty, Paris, France (remote) — *Frontend Developer*

2021 (Freelance)

Developed the landing page and knowledge base for a France based Fintech. Multilingual project using React, NextJS, Styled Components and Ghost API. Site goes through a CI pipeline before getting deployed on DigitalOcean Apps.

Kindbridge, TN, USA (remote) — *Full Stack Developer*

2021 - 2022 (Freelance)

Built and maintained a full stack Web Application using Django for mental health therapists to schedule appointments with patients, as well as Stripe payment integration. Integrates with multiple third party API's and includes authentication. Deployed to AWS.

Saint Solutions, RSA (remote) — *Software Engineer*

2019 - PRESENT (Semi-permanent contractor)

Developed ERP automations and integrations to cloud based Asset and Maintenance Management Software. Developed a Cloud based SAAS Maintenance Management System, using NodeJS, ReactJS, Prisma, PostgreSQL and Docker. Micro-services (APIs) with Python and Django.

Game Quitters, CA, USA (remote) — *Full Stack Engineer*

2018 - PRESENT (Freelance)

Developed an interactive learning platform with an integrated course using React, NodeJS and MongoDB. Also maintaining the heavily SEO-Optimized WordPress blog, marketing site and a Hobby Tool developed with ReactJS.
